Using Second Hand and Discount Stores

Careful planning and shopping are essential for finding the items you want or need, at the price you can afford. This Clothing Directory contains a listing of wholesale, manufacturing, discount and second hand clothing outlets in Winnipeg and those located in rural Manitoba. This listing is current as of December, 1999.

It is important to remember that new places open, old ones close, and others may change their hours of operation or location. If you are making a special trip, looking for a special item, or need assistance, it may be worth a phone call first. Check the yellow pages in your telephone directory under the headings:

- Second Hand Stores
- Clothing Bought and Sold
- Consignment Services, or
- The listings in this Directory.

This Directory is by no means a complete list of every store that carries second hand or discount priced clothing. An attempt has been to contact all stores and offer them the opportunity to be included in this Directory. The inclusion, or omission, of any store is not intended as an endorsement of those that are listed.

This Directory is updated bi-annually with the assistance of a student from the Faculty of Human Ecology, Family Studies Practicum course, University of Manitoba. This Directory is available as a single copy for consumer reference, or as a **Print Master** for duplication for educational purposes.

Buymanship Tips

- Make a list before shopping, including the estimated budget you have available for the items to be purchased.
- Avoid impulse buying. Plan ahead!
- Comparison shop considering overall value before you buy. Remember a more expensive, but better quality item that has a "classic" design is fashionable for a longer period of time.
- Check the store policy for returns and exchanges: When buying an item on sale it often cannot be returned. Consider whether you would want the item if it were not on sale. Keep all tags and sales receipts for future reference.
- Buy items at the end of season for lower prices.
- Consider the quality of the garment before purchasing it, check the sewing and thread for strength. Read the care labels carefully.
- If the garment does not fit, return it right away as some stores only accept returns for a limited number of days.
- Consider the cost of maintenance when making selections. The need for frequent dry cleaning, or other special care, can significantly raise the overall cost of the garment during its lifetime.
- For further information on family financial topics see other fact sheets available from the Home Economics Section, Manitoba Agriculture and Food at (204) 945-8564, or call your district home economist in rural communities.
